

You're an important part of our future. Hopefully, we're also a part of yours! At B. Braun, we protect and improve the health of people worldwide. As a Corporate Start-Up based in Freiburg, Germany, B. Braun New Ventures takes a lead role in the digital transformation of healthcare. With a young and fast-growing team, we develop solutions to automate medical procedures across various business areas. Our goal is to augment caregivers' eyes, hands and decision making with sensors, robotics and artificial intelligence. Our cloud platform team is focused on creating corporate-wide solutions that will drive the next generation of B. Braun's digital products and connected devices. The technologies and products we develop create new treatment possibilities, enable sharing of clinical experience and result in better patient care.

User Experience and Interface Designer (UX/UI) (f/m/d) - Digital Surgery

Reference Code DE-HS0424-87544

For the B. Braun New Ventures Team in Freiburg we are searching for a User Experience and Interface Designer (f/m/d) in digital surgery.

Duties and responsibilities

- You create end to end experiences and interfaces for innovative digital products from early research until product launch
- You analyse user needs, understand business goals, define personas, observe user tasks flows and create information architectures, perform testing and quality assurance
- You develop multi modal cross-device screen flows, interactive prototypes and implementation ready interface designs under the Human Centered Design aspect following the B. Braun design system
- You work in a dynamic and agile team collaborating with other UX/UI Designers, Engineers, Researchers as well as with developers, software architects, system engineers and product owners
- You are a key member of the digital surgery cloud platform team with close connection to the hardware device team
- You offer mentorship and support to inquiring minds, helping them to grow and develop professionally
- You belong to the global B. Braun UX/UI community and define standards for the design system, UX methods, templates and tools

Professional competencies

- You are a passionate UX/UI designer with several years of industry experience in medical technology, especially in the (digital) operating room environment
- You have the ability to think abstractly, strategically and analytically to solve complex, multi-factorial design problems
- You have a strong understanding of modern web and mobile practices to create an efficient user experience in the B2B world
- You are capable of conceptual, open-minded, creative and non-linear thinking, and at the same time high aptitude for process-oriented and structured progress
- You have hands-on experience with tools, such as Paper and Pen, Figma, Adobe CC and others that helps you to create, test, demonstrate and communicate ideas, concepts and solutions quickly and effectively
- You are proficient in Lean UX, Design Thinking and Agile Development such as SCRUM or SAFE
- You would stand out with experience in UX-Engineering, UX-Research, and UX-Writing
- You have working experience in the healthcare industry or in a comparable field

Personal competencies

- You have a proactive, results-oriented and customer-centric personality with analytical and problem-solving skills
- You work effectively in multidisciplinary teams, encourage collaboration, also virtual one and mutual support
- You are self-motivated and you have a hands-on mentality
- You have a passion for data driven design and a desire to continuously learn and grow
- You stay productive and capable of acting in critical situations
- You communicate professionally in English and German
