

You're an important part of our future. Hopefully, we're also a part of yours! At B. Braun, we protect and improve the health of people worldwide. This is also our vision for research and development. You see complexity as an opportunity – and quality and sustainability are important criteria for your work. We would like to work with you on tomorrow's solutions. That's how we work to create sustainable healthcare – locally, in regions, countries and worldwide. Together. That's Sharing Expertise.

QA Engineer – Cloud Applications (f/m/d)

Reference Code ES-SBL-DOI-87435

You're an important part of our future, and hopefully, we're also a part of yours! At B. Braun, we protect and improve the health of people worldwide. From Barcelona, you will join Germany-based Corporate Start-Up B. Braun New Ventures, which is taking a leading role in the digital transformation of healthcare. With a young and fast-growing team, we develop solutions to automate medical procedures across various business areas. Our goal is to augment caregivers' eyes, hands, and decision-making with sensors, robotics, and artificial intelligence. Our cloud platform team is focused on creating corporate-wide solutions that will drive the next generation of B. Braun's digital products and connected devices. The technologies and products we develop create new treatment possibilities, enable sharing of clinical experience, and result in better patient care. From our Barcelona location, you will be integrated into an international team that collaborates to achieve these goals.

For the B. Braun New Ventures Team in Freiburg we are searching for a QA Engineer – Cloud Applications.

Duties and responsibilities

- You define and perform software tests of various cloud services - accompanying projects from conception to launch
- You define test strategies for cloud services
- You are responsible for managing test infrastructure and execution
- You discover and formulate test specifications based on product requirements as well as on normative and regulatory requirements
- You perform systematic testing as well as load and penetration testing
- Develop methods and tools for structured and efficient testing - including test automation
- Write test plans and test reports as part of the technical documentation
- You work in an interdisciplinary project team that implements the project using SCRUM
- You take broad responsibility for the verification and validation process and significantly contribute to the progress of projects

Professional competencies

- You have a strong technical background with cloud solutions
- You have experience in statistical methods and tools for verification
- Knowledge of risk management for medical devices is a plus
- You are passionate about testing
- You set high standards for quality at the same time enjoy finishing tasks on time
- You are a hands-on doer, a self-starter, a strong team player and a continuous learner
- Fluent in English, fluent in German would be a plus
- Enthusiasm for high-tech medical products rounds up your profile

Personal competencies

- You are proactive, results-oriented personality with strong problem-solving skills
- Your work ethic is collaborative; you thrive in multidisciplinary teams as well as virtual environments while fostering mutual support
- You are self-motivated with a hands-on mentality
- You possess a passion for technology and a desire to continuously learn and grow
- You stay productive and capable of acting even in critical situations
- You communicate clearly and responsibly in English. Experience with German would be a plus.

What we offer

Join a company that combines the innovation and agility of a start-up with the stability and global reach of a healthcare leader. By working with us, you'll be part of a team dedicated to improving people's health and healthcare services. Our corporate culture values accountability, diversity, and trust. Embrace a highly motivated international team, flat hierarchies, and fast decision-making. Barcelona, a vibrant city with a high quality of life, is an ideal location for you to grow professionally and personally.

Benefits

- Flexible and family oriented working hours and hybrid working between office and home
- A brand-new modern office optimized for concentration and collaboration with an integrated high-tech simulation operating room and generous social areas and creativity zones
- High quality of life in one of Germany's most attractive cities
