

You're an important part of our future. Hopefully, we're also a part of yours! At B. Braun, we protect and improve the health of people worldwide. This is also our vision for research and development. You see complexity as an opportunity – and quality and sustainability are important criteria for your work. We would like to work with you on tomorrow's solutions. That's how we work to create sustainable healthcare – locally, in regions, countries and worldwide. Together. That's Sharing Expertise.

## UX/UI Designer (f/m/d) for medical solutions

Reference Code DE WM0523-86585

B. Braun is one of the world's leading medical technology companies. With over 65,000 employees, this family-owned company stands as a true partner, ready to develop smart solutions and set standards that advance healthcare. As part of our technology strategy, we are currently looking for new support for our digital team. With more than 370 dialysis centers serving 28,000 patients, our focus is on developing the medical software "Nexadia," which simplifies the daily routines of medical staff.

Our vision is to completely redevelop the previously self-hosted systems for the cloud. This project will be developed using agile methodologies (SAFe) and a modern tech stack including MS Azure, IoT Hub, Edge components, Docker, and more.

Due to the complex interplay of our hardware systems, which include dialysis machines and scales, our team will regularly work on-site in Melsungen.

This is a unique opportunity to be part of an ambitious project that will not only positively influence dialysis treatment but also the entire digitalization strategy of B. Braun. Your commitment will contribute to creating a software solution that improves the workflow of nursing staff and enables them to focus on patient care.

In your new role as UI/UX Designer (f/m/d), you are responsible for developing the User Experience and User Interface of our dialysis software "Nexadia NG." This includes the creation of Task flows, Figma Prototypes, contributing Design System UI Elements, as well as testing and quality Assurance with the developers. You will be developing agilely with modern technologies and are an essential part of the project.

### Duties and responsibilities

- Responsible for the User Experience and Interfaces for the innovative medical software "Nexadia NG" - from idea, pre-development, implementation, and user testing to quality control with developers.
- Develop low-, mid-, and high-end interactive prototypes under the Human-Centered Design aspects using tools like Figma.
- Define User Interface Solutions mainly for Web-Apps, partly for Graphical User Interfaces on our Dialysis Machine
- Analyze and understand user requirements, understand business goals, create personas, task flows, information architectures, Navigation Concepts.
- Work in an agile environment with experts in UX/UI, software and hardware development, architecture, and project management.

### Professional competencies

- Passionate UX/UI designer with several years of industry experience, preferably in developing software solutions for the healthcare sector.
- Experience in leading projects, design service providers, and UX/UI teams technically.
- Skills in creating Graphical User Interfaces for software applications.
- Experience with agile development methodologies such as SCRUM, SAFe, and tools like Figma, Adobe CC.
- Knowledge in UX engineering, UX research, and ideally UX writing.
- The position is also available for job-sharing. Become part of our global B. Braun UX/UI community and define standards for the design system and UX techniques. We offer mentoring and support for those eager to learn and help them to develop professionally.

### Personal competencies

- You are a proactive, results-oriented and customer-centric personality with analytical and problem-solving skills
- You work effectively in multidisciplinary teams, encourage collaboration, also virtual one and mutual support

- You are self-motivated and you have a hands-on mentality
- You have a passion for data driven design and a desire to continuously learn and grow
- You stay productive and capable of acting in critical situations
- You communicate clearly and responsibly in German and English.

### What we offer

Become part of a corporate culture that actively promotes constructive exchanges between colleagues, customers and partners. Work with us to improve people's lives in the long term. We can offer you interesting, varied tasks and excellent opportunities for advancement, as well as an attractive salary with extensive benefits, all within a dynamic family-owned company.

### Benefits

- At B. Braun, we value the networking and collective growth of our employees. That's why we regularly invite our staff to our special Community Events throughout the year. These events are a great opportunity to meet colleagues from all over the world and exchange ideas and experiences in an inspiring environment. Our events range from hackathons to UX/UI workshops, offering more than just professional exchange – they are a platform for communication, collaboration, and a shared togetherness focused on a common goal.

### Closing date

30.06.2024
