

# DIABETES FACTS AND FIGURES

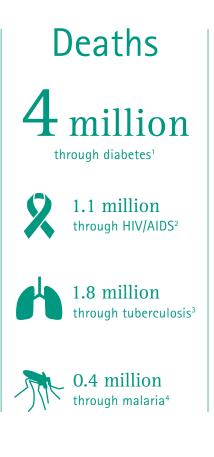

One in 10 adults will have diabetes.<sup>1</sup> 2045

**One** in **two** adults with diabetes is **undiagnosed**.<sup>1</sup>

## 1. China (114.4) 2. India (72.9) 3. USA (30) 4. Brazil (12.5) 5. Mexico (12.0) 6. Indonesia (10.3) 7. Russia (8.5) 8. Egypt (8.2) 9. Germany (7.5) 10. Pakistan (7.5)

Top 10 countries: Millions of adults with diabetes (2017)<sup>1</sup>

1) International Diabetes Federation (2017). IDF diabetes atlas: Eighth edition; 2) World Health Organization (2016): http://www.who.int/mediacentre/ factsheets/fs360/en/ (viewed on 1 March 2017); 3) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs104/en/ (viewed on 1 March 2017); 4) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs094/en/ (viewed on 1 March 2017); 4) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs094/en/ (viewed on 1 March 2017); 4) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs094/en/ (viewed on 1 March 2017); 4) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs094/en/ (viewed on 1 March 2017); 4) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs094/en/ (viewed on 1 March 2017); 4) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs094/en/ (viewed on 1 March 2017); 4) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs094/en/ (viewed on 1 March 2017); 4) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs094/en/ (viewed on 1 March 2017); 4) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs094/en/ (viewed on 1 March 2017); 4) World Health Organization (2016): http://www.who.int/mediacentre/factsheets/fs094/en/ (viewed on 1 March 2017)

## B. BRAUN DIABETES CARE

A good therapy program is crucial for patients with diabetes to lead a normal, self-determined life.

To achieve this goal, we offer high-quality products and services in the areas of blood glucose measurement, capillary blood collection, insulin injection and data management.

### PRODUCTS IN THE DIABETES THERAPY FIELD AT A GLANCE

#### Blood glucose measurement and capillary blood collection

#### Omnitest<sup>®</sup> 5 blood glucose measurement device

- Large, illuminated LCD screen
- High measuring accuracy acc. to ISO 15197:2013 and EN ISO 15197:2015
- Only 5 seconds measuring time
- Easy to use
- Compatible with fresh capillary and venous whole blood samples

## Omnican<sup>®</sup> fine pen needle and Omnican<sup>®</sup> insulin syringe

- Gentle penetration
  - Special silicone finish
- Pen cannulas with 3-facet grinding are compatible with all major pen manufacturers on the market
- Improved insulin flow thanks to thin-wall or extra-thin-wall technology according to ISO 9626

## Omnican<sup>®</sup> Lance lancing device with Omnican<sup>®</sup> Lance soft lancet

- One-hand operation
- 7 finely graduated penetration depths
- Gentle puncture and good blood flow
  - Silicone oil coated tip
  - 3-facet grinding

#### Data management

#### Omnitest<sup>®</sup> app digital diabetes diary

- Simple data management
- Better understanding of the data including different views such as tables, graphs, average day, statistics
- Data can be exported, for example for the next doctor's appointment
