Best practice recommendation to prime Intrafix® Primeline and Intrafix® SafeSet in combination with semirigid container/bags.

1. Unwrap the IV-set and check whether the green air vent cap is closed and the roller clamp is open.

2. Turn the IV-system upside down. Squeeze impulsively the drip chamber and bring fluid level up to the ring of the drip chamber.

3a. Spike the semirigid container/bag.

3b. Close the roller clamp.

4. Open roller clamp.

5. Squeeze the drip chamber impulsively once again.
