ASKINA® BARRIER FILM
LASTING SKIN PROTECTION FOR STOMA AND WOUND CARE
No sting, rapid drying, breathable skin barrier
Askina® Barrier Film
No sting, rapid drying, breathable skin barrier

When to use Askina® Barrier Film?

1. TO PREVENT skin breakdown caused by FRICTION or MOISTURE
   - Protection of vulnerable areas: heels, elbows, toes, hips – from the first signs of reddening caused by friction.
   - Protection of incontinent patients’ skin.

2. TO PROTECT skin at risk from MACERATION and EXCORIATION
   - Periwound skin.
   - Peristomal area.
   - Around fixation sites for drainage tubes and external catheters.

3. TO MAINTAIN the integrity of newly healed skin to stop secondary breakdown

Indications Askina® Barrier Film

Askina® Barrier Film is indicated for use on intact or damaged skin. Askina® Barrier Film acts as a protective barrier:
- Against irritation from bodily fluids
- For sensitive and fragile skin
- Under adhesive dressings to reduce disruption to newly healing tissue
- For damaged skin
- For skin tears
- To protect periwound and peristomal areas
- For small cuts and tears
- At fixation sites for drainage tubes and external catheters

Completely sting free

![Stinging Index (Cumulative Score)]

Results of a study:
19 patients rated stinging on a scale of 0-4
0 (no stinging), 1 (mild), 2 (moderate), 3 (severe), 4 (extreme)
How to use Askina® Barrier Film?

1) Skin preparation
   • Cleanse the skin with appropriate cleansing solution and dry thoroughly.

2) Application
   • Holding the spray nozzle 10 – 15 cm from the skin, press the spray nozzle and apply a smooth coating of film over the necessary area.
   • Allows the film to dry for 30 seconds.

3) Removal
   • If necessary, can be removed with any common medical adhesive remover.

Benefits in stomacare

Significant irritation of peristomal skin at day 1.

Signs of irritation have been almost entirely resolved at day 15.

After 15 days of use of Askina® Barrier Film, a net improvement of the peristomal skin is noticed.
