WHO IS AT RISK OF PRESSURE ULCERATION?

Reduced mobility/activity

History of pressure ulceration

Impaired circulation due to diabetes, vascular problems, oedema

Increased skin humidity (eg due to incontinence, perspiration)

Poor nutritional status

AREAS AT RISK

1 to 4 out of 10 hospitalized patients have pressure ulcers(1)

95% of pressure ulcers are preventable(2)

PRESSURE ULCER PREVENTION

Linovera® promotes skin integrity using hyperoxygenated fatty acids.

ABOUT PRESSURE ULCER

A pressure ulcer is a localised injury of the skin and/or underlying tissue usually over a bony prominence, caused by pressure, or combination of pressure and shear.

STOP PRESSURE ULCERS

21 Nov is the official day to raise awareness

HOW TO PREVENT PRESSURE ULCERS(3)?

Healthy body weight & Nutrition

Quit Smoking

Hydration and moisture

Skin inspection

Ease pressure and prevent friction

Spread awareness

B. BRAUN SOLUTIONS

Askina® Heel
Hydrophilic foam dressings
Anatomically shaped hydrocellular heel dressing

Linovera® Solution of hyperoxygenated fatty acids
In a prospective study, none of the high risk patients preventively treated with Linovera oil developed pressure injuries.(4)

Askina® DresSil® Sacrum
Foam dressings with silicone adhesive

Askina® Barrier Cream
Protectant and moisture barrier
